

Releases Reported by Trans Mountain - 1961- February 2017 (Updated: April 1, 2017)

Trans Mountain has a comprehensive safety and preventative maintenance program that includes the protection of stream and river crossings. These spill prevention systems are fully documented and can be audited by the National Energy Board (NEB), the federal regulator of pipelines in Canada that cross inter-provincial boundaries.

Trans Mountain acknowledges that spills do happen. While no spill is acceptable, the key is to ensure that robust response measures are in place to deal with incidents. Trans Mountain staff, combined with trained responders and contractors, provide for 24/7 response management along the 1,150-kilometre pipeline.

Trans Mountain is required to report spills greater than 1.5 cubic metres (approximately 9.5 barrels) or any spill to a water body regardless of volume, to the NEB. The reporting rules have changed over the years. Trans Mountain has always followed the NEB spill-reporting regulations. Since 1961, Trans Mountain has reported 81 spills on its pipeline system to the NEB, some of which are below the reportable threshold.

It is important to note that 69 per cent of all spills have occurred at Trans Mountain pump stations or terminals. These facilities have monitoring and spill containment systems that are rigorously maintained and meet NEB standards.

Since 1956, vessels from our Westridge Marine Terminal have been transporting petroleum products safely through Port Metro Vancouver without a single spill from a tanker.

Following each spill, Trans Mountain conducts a thorough incident investigation that contributes to improved spill prevention and management initiatives. Below is a summary of spills reported to the NEB by Trans Mountain between 1961 and January 2014.

IncidentNo	Detected	ReportingCompany	Line Pipe	Pump Station	Terminal /Tank Farm	Substance	Spill Volume in Cubic Metres	Spill Volume in Barrels (6.29 barrels per cubic metre)	Location	Region
1961-011	7-Aug-61	Trans Mountain Pipe Line Company Limited	1			Crude Oil	Unknown	Unknown	MP 647.9 - Mainline	BC, NE of Popkum
1962-013	23-Aug-62	Trans Mountain Pipe Line Company Limited	1			Crude Oil	1.6	10.1	MP 520.1- Mainline	BC, S of Kamloops

2014-017	22-Jan-14	Trans Mountain Pipeline ULC		1		Crude Oil	2.7	17.0	TMPL- Chip Station	AB, Chip Lake
* May 12, 2014 UPDATE: Based on initial observations and an estimate at the time of the release, KMC initially reported 25 bbls of petroleum being released. A revised interim volume of 112 bbls has been calculated and reported based on clean up in 2013 and oil recovery to date. As clean up efforts at this location will continue in 2014, KMC will continue to do what is necessary to ensure that regulatory criteria for clean up and remediation are being met. Once clean up efforts have been completed, (late fall 2014) the release volume may be further revised, if site data warrants change.
